Yamada America

Yamada InkPRO® pumps.

Air Flo Spray Equipment is your exclusive source for the Yamada InkPRO® piston pump for offset inks. The Ink-PRO® is the first pump designed specifically for offset lithographic printing ink transfer. With over 2,500 pumps installed worldwide the pump has proven itself as the premier pump for the commercial printing industry.

DOPAG Group

DOPAG industrial metering & mixing technology

Ideas and systems for future-oriented metering and mixing technology. Dopag Group provides systems for plural component polymers and single component media such as greases, oils and pastes. For more than 30 years the group has developed systems and components to suit your individual needs.

IR-ARO

Ingersoll-Rand Fluid Technologies

No matter what your product, process or location, Ingersoll Rand / ARO offers a broad range of pumps and accessories, dispensing systems, and a world-wide distribution and service network prepared to solve your fluid handling challenge.

Lincoln

Lincoln fluid handling products.

For over 90 years, Lincoln has been recognized as a leader in lubrication tools. Heavy-Duty Lubrication Pumps are no different, and Lincoln offers a complete line of performance proven pumps for grease, oil, and other fluids.

Graco

Graco: Worldwide leaders in fluid handling

Providing innovative solutions to a diverse global market Graco offers systems, products and technology that set quality and production standards in a wide range of fluid handling applications .

Spraying Systems Co.

Spraying Systems Co., which is celebrating its 70th anniversary, is the leader in spray technology. Founded in 1937 in Chicago, IL the company has grown from its humble beginnings in a small converted garage to a worldwide manufacturer of industrial spray products.

BINKS & DeVilbiss

Binks pioneered the development of liquid spray finishing technology over 100 years ago and continues to set the standard for industrial spray finishing. Today, you can find Binks spray finishing technology at work in virtually every industry around the world. DeVilbiss has maintained its commitment to innovative technology by establishing itself as a team of experts who thoroughly understand the intricacies of the finishing process, the equipment design needed for achieving the highest quality finish, and the bottom line needs of customers to maximize productivity.

OPW Engineered Systems

OPW Engineered Systems specializes in the engineering, designing and manufacturing of systems for the safe and efficient loading and unloading of critical hazardous materials: loading systems, swivel joints, instrumentation, quick and dry disconnect systems and safety breakaways.

SMC

SMC is the world's largest manufacturer of pneumatic automation products. At SMC, we have the widest range of products, engineered to meet applications in every sector of the market. From Semiconductor to Automotive, Medical to Petroleum, our products are designed to fit your unique requirements.

Dynamic Fluid Components

Dynamic Fluid Components is a supplier of fluid power accessory components, including Low Speed High Torque Hydraulic motors, Hydraulic gear pumps, Pressure gauges, Ball valves, Inline check valves, Flow control and Needle valves, Diagnostic test points & plugs, Test hose, Breathers, Filler breathers, Sight level gauges and Aluminum Manifolds.

Air-Mite Devices

Air-Mite Devices was founded in 1950. In those early days the product line included bench top air presses, control valves and a small series of air cylinders. Today Air-Mite has expanded its line to include a variety of Pneumatic Automation Components including air arbor presses, four (4) separate series of air cylinders, various series of air and hydraulic valves, several safety circuit components, and many miniaturized accessories.

Bi-Torq

AVK-Carbo-Bond/ Bi-Torq has provided full service engineering and manufacturing of customized automated valve kits since 1981. Since the beginning they have received praise within the industry for their service and ingenuity regarding the wide variety of valve automation systems & accessories that they produce.
